

ASX AND MEDIA RELEASE

2 June 2005

Drilling To Commence at Pha Luang Zinc Project in Laos

Rox Resources Limited (ASX: RXL; "Rox") today advised that drilling is anticipated to commence at the Pha Luang zinc project in Laos within the next week.

In April 2005 Rox negotiated the right to acquire a 60% interest in the sulphide portion of the project and is undertaking this drilling campaign as part of its due diligence prior to making a final decision to purchase the project.

At Pha Luang there are a number of zinc oxide outcrops and three of these will be tested by up to 600 metres of diamond core drilling; Pha Luang 2, Pha Luang 3 and Bon Noi.

Recent rock chip sampling of oxide-carbonate outcrops at various target areas (see attached map) confirmed the tenor and extent of surface mineralisation. Selected results are given below.

	Zn %	Pb %	Ag ppm
Pha Luang 2	45.80	0.76	24
Pha Luang 3	53.30	0.59	5
Bon Noi	29.40	21.20	161
Gao Noi	2.31	60.90	485
Switchback #23	52.00	0.45	38
Switchback #25	26.10	0.86	10

The drilling is expected to take about 30 days.
